

Your go-to health care resource when you're on the go.

Now upgraded with simpler navigation, UnitedHealthcare Health4Me® puts your Oxford plan in your hands—24 hours a day, seven days a week.

Three ways Health4Me can work for you.

Estimate costs.

With the myHealthcare Cost Estimator tool, you can estimate out-of-pocket costs before you go to the doctor. Just enter a procedure or condition and see how different costs can be depending on where you go for care.

Access important information, immediately.

View and share important information, email your family's health plan ID cards, review claims, and check account balances and benefit amounts.

Get real, personal care.

The Health4Me app can also connect you with helpful professionals when you need them.

The Easy Connect feature asks you what kind of help you need, then has a Health Advisor contact you to answer your questions.
